Agile Development

I am a determined, self-motivated and inventive Software Engineer. Having earned a certificate at the University of Birmingham Coding Boot Camp, I became effective in time-management, teamwork and independent problem-solving. I used these skills as a Web Developer at Anders Pink and a Software Engineer at Clarity Software, where I continued my constant desire to grow and learn, and develop complex code that is well-organised, efficient and easy to comprehend and debug. As a personable and affable person, I love working with new people. Communication, organisation and attention to detail are among my strongest assets.

EXPERIENCE

Clarity Software Group Ltd. **2022-Present**
Software Engineer *Hybrid Role, Solihull, West Midlands*

- Enhanced and maintained large-scale business workflow app with hundreds of features and complex business logic.
- Led front-end React development and React Native mobile development, re-writing key features, fixing bugs, improving performance and completing major projects..
- Contributed to back-end service features and improvements in Java and Spring Boot.
- Developed and maintained automated testing strategies, including unit tests, Cypress E2E, and JMX performance testing.
- Managed large-scale library upgrades and MySQL migrations, supporting data integrity and performance.
- Participated in Agile workflows, including stand-ups and sprint-planning meetings.
- Mentored junior front-end engineers and guided senior back-end engineers on front-end skills.

Anders Pink Ltd. **2021-2022**
Web Developer *Working Remotely*

- Maintained and improved web-based business e-learning tool.
- Created new homepages and recreated customer support page.
- Implemented customer-requested features and bug fixes.
- Regular calls with customers learn how they used software and desired improvements.

Birmingham Motor Tyres Ltd. **2017-2020**
Warehouse Operator & Administrator *Birmingham, UK*

- Coordinated with salespeople and warehouse operators to serve customers picking tyres for delivery and unloading delivery trucks.
- Administrative role filing internal delivery paperwork and handling telephone calls.
- Trained new employee to succeed myself as administrator.
